Nest Rack

- Easier installation and cleaning – racks can be set up in a few minutes and need not be anchored.
- Two nests per rack – staggered nest back prevents hens passing from one nest to another.
- More versatility – place your nests where you need them – individually, in pairs, or in rows.

- Easier egg gathering – nests are at a convenient height for gathering eggs. Bottom perches are 24 inches (610 mm) above litter on lower tier and 30 inches (762 mm) on opposite tier.
- Sturdy construction – heavy gauge galvanized material resists rusting.
- Built-in anti-roost – flipper bar discourages roosting.
- If nests are installed with nest rack, shorter top perch arms are recommended.
